

Foot Switches

Standard Momentary Covered

The aluminium pressure die-cast protective shroud (F3: aluminium sand casting) fully shields the pedal at the top and sides while the wide base provides a high degree of stability. It reliably prevents accidental operation from above by falling objects or careless operation from the side. Due to its robust construction the protective shroud withstands a drop of 20 kg from a height of 1 m.

Ordering Instructions for foot switches with protective shroud

Foot switches with protective shroud have "UN" in the article designation.
